Video Clips by Grade, Including Demographics	xxxvi

SECTION I Getting Started: Mathematics Learning with Classroom Discussions 1

CHAPTER 1 Academically Productive Talk: An Overview 3 *What does productive math talk sound and look like?*

Professional Development Session 1.1: A First Encounter with Examples of Productive Math Discourse	5
Professional Development Session 1.2: Talk Moves That Help Individual Students Clarify and Share Their Own Thoughts	15
Professional Development Session 1.3: Talk Moves That Help Students Orient to the Thinking of Others	23
Professional Development Session 1.4: Talk Moves That Help Students Deepen Their Reasoning	30
Professional Development Session 1.5: Talk Moves That Help Students Engage with the Reasoning of Others	36
Professional Development Session 1.6: Your Turn: Watching and Analyzing Talk Moves	43

CHAPTER 2 How Do We Begin? Classroom Norms for Productive Talk 47
How do we talk about math?

Professional Development Session 2.1: Setting Up Classroom Talk Norms 48

SECTION II The Mathematics: What Do We Talk About? 59

CHAPTER 3 Talking About Mathematical Concepts 63

Professional Development Session 3.1: Exploring Number Patterns 64

Professional Development Session 3.2: Exploring the Perimeter of Rectangles with a Fixed Area 72

CHAPTER 4 Talking About Computational Procedures 81

Professional Development Session 4.1: Adding by Place Value 82

Professional Development Session 4.2: Representing Fractions as Percents 88

CHAPTER 5 Talking About Solution Methods and Problem-Solving Strategies 95

Professional Development Session 5.1: Solving a Multistep Word Problem 97

Professional Development Session 5.2: Placing Fractions on a Number Line 105

CHAPTER 6 Talking About Mathematical Reasoning 113

Professional Development Session 6.1: Using Deductive Reasoning 115

Professional Development Session 6.2: Using Inductive Reasoning 121

CHAPTER 7 Talking About Mathematical Terminology, Symbols, and Definitions 127

Professional Development Session 7.1: Connecting Words and Meanings Through Use in Context 129

Professional Development Session 7.2: Working with Definitions 140

SECTION III Implementing Classroom Discussions 151

CHAPTER 8 Planning Talk-Based Lessons 153

How do we create lesson plans that focus explicitly on student discourse?

Professional Development Session 8.1: Planning a Talk-Based Lesson for Addition (Grade 1) 155

Contents

Professional Development Session 8.2: Planning a Talk-Based Lesson About Graph
Conclusions (Grade 3) 164

Professional Development Session 8.3: Planning a Talk-Based Lesson on the Volume
of Rectangular Prisms (Grade 5) 177

Reproducibles (Available on CD)

Handouts (Discussion Questions)

Lesson Planning Template

Lesson Plans
