

Wipeout

You need: Pattern blocks, 1 set

Fraction cube with the faces labeled $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{3}$, $\frac{1}{6}$, $\frac{1}{6}$, $\frac{1}{6}$

This is a two-person game. The goal is to be the first to discard your blocks. You each should start with the same number of hexagons, either one, two, or three.

Directions:

1. Take turns rolling the fraction cube.
2. You have three options on each turn: remove a block (only if it's the fractional part of the hexagon indicated by the fraction face up on the cube), exchange any of your remaining blocks for equivalent blocks, or do nothing and pass the cube to your partner. You may not remove a block and trade on the same turn – you can do only one or the other.

Be sure to pay attention to each other's trades to make sure they are done correctly.
