First a math problem

$$99 + 17$$

$$99 + 17$$

Lauren

$$99 + 10 = 109$$

$$109 + 7 = 116$$

$$99 + 17$$

Lauren / Alessandra

$$99 + 10 = 109$$

$$109 + 7 = 116$$

Jake

9 plus any number
is 1 less than the
number you had.

$$(9 + 7 = 16)$$

6 is 1 less than
the 7

The answer had to
end in 6.

So I knew the
answer had to be 116.

Shu
Rug

GO

TEACHER

$$99 + 17$$

Lauren/Alessandra

$$99 + 10 = 109$$

$$109 + 7 = 116$$

Jake

9 plus any number
is 1 less than the
number you had.

$$(9 + 7 = 16)$$

6 is 1 less than
the 7

The answer had to
end in 6.

So I knew the
answer had to be 116.

Eliane

$$9 + 7 = 16$$

$$90 + 10 = 100$$

$$16 + 100 = 116$$

uren / Alessandra

$$-10 = 109$$

$$+7 = 116$$

Jake

9 plus any number
is 1 less than the
number you had.

$$(9 + 7 = 16)$$

6 is 1 less than
the 7

The answer had to
end in 6.

So I knew the
answer had to be 116.

Eliane

$$9 + 7 = 16$$

$$90 + 10 = 100$$

$$16 + 100 = 116$$

Lindsay

$$9 + 7 = 16$$

$$16 + 10 = 26$$

$$26 + 90 = 116$$

$$99 + 17$$

Lauren/Alessandra

$$99 + 10 = 109$$

$$109 + 7 = 116$$

Jake

9 plus any number
is 1 less than the
number you had.

$$(9 + 7 = 16)$$

6 is 1 less than
the 7

The answer had to
end in 6.

So I knew the
answer had to be 116.

Eliane

$$9 + 7 = 16$$

$$90 + 10 = 100$$

$$16 + 100 = 116$$

Lindsay

$$9 + 7 = 16$$

$$16 + 10 = 26$$

$$90 + 26 = 116$$

$$9 + 7 = 16$$

$$16 + 10 = 26$$

$$90 + 26 = 116$$

①

②

$$90 + 17 = 107$$

$$107 + 9 = 116$$

Common Core Connection

- Common Core Standards for Mathematical Practice
- Common Core Standards for Mathematical Content

Common Core Recommendation:

... a “balanced combination of procedures and understanding.”

Common Core Caution:

... “students who lack understanding of a topic may rely on procedures too heavily.”

Standards for Mathematical Practice

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. **Construct viable arguments and critique the reasoning of others.**
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.

Why is Marilyn Burns so excited about MRI?

The Assessments

Math Reasoning Inventory (MRI) is an online formative assessment tool designed to make teachers' classroom instruction more effective.

[Learn More](#)

The Reports

MRI instant reports can be used to inform instruction, monitor progress, identify students who would benefit from intervention, and communicate with parents.

[Learn More](#)

Reasoning Strategies

The MRI Interview reveals the strategies students use to reason with whole numbers, decimals, and fractions.

[Learn more](#)

"In just a few minutes, I was able to gain valuable awareness about my math students and adjust my lessons accordingly."

— Diana Jones
Grade 6 Teacher
SLCUSD, California

MRI asks questions that the Common Core expects all students entering middle school to be able to answer successfully.

1 Question 1

1000 - 998 =

I'm going to show you some problems one at a time. Try to figure out the answers in your head. The first problem is 1000 minus 998.

2 Strategy

How did you figure out the answer?

- ☐ Used standard algorithm to subtract
- ☐ Counted up or added 2
- ☒ Added 98 + 2 and applied to 998 + 2
- ☐ Gave other reasonable explanation
- ☐ Quessed, did not explain, or gave faulty explanation

Progress bar showing 5 selected options: 1, 2, 3, 4, 5. Buttons: Not Done, Incomplete, Done, Current.

Notes

Reasoning is the heart of MRI.

The *Interview* is the core of MRI.

- We ask . . .
- We listen . . .
- We learn . . .

Practice Standard #3:

Construct viable arguments and critique the reasoning of others.

Prompts for student writing.

Grade 4:

It means . . .

Every students needs to learn . . .

17 12/14/13

Common Core Practice Standard Number 3.

What it means:

Every student needs to learn how to explain their thinking. It is more important to be able to explain. If you didn't explain your thinking you would not learn that much, if all you needed were answers you would use calculators and your brain would not learn.

CCS

12/4/13

Practice standards #3

What it means
It means that you defend your answer. It means
to say your answer is right. Your answer has to
make sense.

Practice Standard #3

12/4/13

Common Core (CCSS)

Every student needs to learn how to explain their thinking and have their answers make sense. Students also need to learn how to ask questions if something doesn't make sense to them. They need to learn how to be able to give other students feedback. I would explain my thinking for 253×7 by doing this:

$$\begin{array}{r} 253 \\ \times 7 \\ \hline 1771 \end{array}$$

$$\begin{aligned} 3 \times 7 &= 21 \\ 50 \times 7 &= 350 \text{ add } 0 \\ 5 \times 7 &= 35 \\ 2 \times 7 &= 14 \\ 200 \times 7 &= 14,000 \\ &\text{add } 2 \\ &0s \end{aligned}$$

12-4-13

Common Core CCSS

Practice Standard #3

It means that you should do something that makes sense and you should be able to criticize and question what the person is doing

CCSSP Practice Standard #3

12/4/13

What it means:

I mean to create viable arguments and critique the reasoning of others. Slow your thinking.

Common Core Connection

Grade 2

Number & Operations in Base Ten

Use place value understanding and properties of operations to add and subtract.

CCSS.Math.Content.2.NBT.B.5 Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.

CCSS.Math.Content.2.NBT.9 Explain why addition and subtraction strategies work, using place value and the properties of operations.

Common Core Connection

Grade 2

Operations & Algebraic Thinking

Represent and solve problems involving addition and subtraction.

CCSS.Math.Content.2.OA.A.1 Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions.

There are ___ girls on the playground.
There are ___ boys on the playground.
There are ___ children in all.

There are 7 girls on the playground.
There are 15 boys on the playground.
There are children in all.

There are 20 girls on the playground

There are 15 boys on the playground

There are 50 children in all.

20

20 + 30 = 50

$$10 + \underline{50} = 60$$

There are 35 girls
There are 15 boys
There are 50 in all.

A COUNTING ADVENTURE

OUT FOR THE COUNT

KATHRYN CAVE • CHRIS RIDDELL

SCHOLASTIC

Approaching from the east Tom saw
a band of pirates armed for war,
with pistols, cutlasses and axes,
looking for some target practice.

No time to hide, no place to run,
outnumbered 45 to one,
Tom ducked beneath the gangplank fast
and tripped them up as they went past.

Grade 2 Benchmark Assessment

The teacher had 99 stickers. She gave ____ stickers away. Then the teacher had 50 stickers. How many stickers did she give away?

Solve with words, numbers, or pictures. Write an equation that represents the problem.

Write an equation that represents this problem.

$$99 - 49 = 50$$

Write an equation that represents this problem.

$$99 - 49 = 50$$

$$\begin{array}{r}
 99 - 9 = 90 \\
 80 \ 1 \\
 70 \ 2 \\
 60 \ 3 \\
 50 \ 4 \\
 49
 \end{array}$$

Write an equation that represents this problem.

$$99 - 49 = 50$$

Write an equation that represents this problem.

$$99 - 30 = 69 - 9 = 60 - 10 = 50$$

A diamond-shaped diagram with the numbers 39 and 49 at its bottom vertices. Lines connect the bottom-left vertex (39) to the first and second subtraction steps of the equation above. Lines connect the bottom-right vertex (49) to the second and third subtraction steps of the equation above.

If it was
100 it would^d be 50. - 1 - 99 - 49

Write an equation that represents this problem.

$$99 - 49 = 50$$

49

Write an equation that represents this problem.

$$50 + \boxed{49} = 99$$

Write an equation that represents this problem.

$$50 + 49 = 99$$

Write an equation that represents this problem.

$$99 - \underline{49} = 50$$

Write an equation that represents this problem.

$$\begin{array}{r} 99 \\ - 50 \\ \hline 49 \end{array}$$

Write an equation that represents this problem.

$$99 - 50 = 49$$

Math Reasoning Inventory

Question 1

1000 - 998 =

I'm going to show you some problems one at a time. Try to figure out the answers in your head. The first problem is 1000 minus 998.

Strategy

How did you figure out the answer?

- ☐ Used standard algorithm to subtract
- ☐ Counted up or added 2
- ☒ Added 98 + 2 and applied to 998 + 2
- ☐ Gave other reasonable explanation
- ☐ Guessed, did not explain, or gave faulty explanation

Progress bar showing 1 of 10 questions completed. Buttons: Not Done, Incomplete, Done, Current.

- ☐ Incorrect
- ☐ Self-corrected (2)
- ☐ Did Not Answer

Common Core Connection

Grade 4

Number and Operations in Base Ten

Use place value understanding and properties of operations to perform multi-digit arithmetic.

CCSS.Math.Content.4.NBT.B.5 Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations.

Common Core Connection

Grade 5

Operations & Algebraic Thinking

Write and interpret numerical expressions.

CCSS.Math.Content.5.OA.A.1 Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols.

CCSS.Math.Content.5.OA.A.2 Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. *For example, express the calculation “add 8 and 7, then multiply by 2” as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.*

Common Core Connection

Grade 6

Expressions & Equations

Apply and extend previous understandings of arithmetic to algebraic expressions.

CCSS.Math.Content.6.EE.A.3 Apply the properties of operations to generate equivalent expressions. *For example, apply the distributive property to the expression $3(2 + x)$ to produce the equivalent expression $6 + 3x$; apply the distributive property to the expression $24x + 18y$ to produce the equivalent expression $6(4x + 3y)$; apply properties of operations to $y + y + y$ to produce the equivalent expression $3y$.*

15 x 12

15		15
<u>x 12</u>		<u>x 12</u>
30		10
150		20
180		50
		<u>100</u>
		180

The diagram illustrates the distributive property of multiplication. It shows two equivalent ways to calculate 15 x 12. On the left, 15 is decomposed into 10 + 5, and 12 is kept as is. On the right, 12 is decomposed into 10 + 2, and 15 is kept as is. The final result, 180, is shown at the bottom of both columns.

Distributive Property of Multiplication over Addition

m](http://www.mathreasoninginventory.com)

Monica: 15×12

*"I did 15 times 10 and it was 150.
And then I did 15 times 2 which is 30.
And it was . . . um . . . 180."*

$$12 = 10 + 2$$

$$15 \times 10 = 150$$

$$15 \times 2 = 30$$

$$150 + 30 = 180$$

Malcolm: 15×12

"I broke apart the 15 and did 10 plus 5.

And then I did 10 times 12 which equals 120.

And then I did 12 times 5 which equals 60

And then I added it all together and I got 180."

$$15 = 10 + 5$$

$$10 \times 12 = 120$$

$$12 \times 5 = 60$$

$$120 + 60 = 180$$

Alberto: 15×12

"I did 12 times 12 is 144

And then I did 3 times 12 and I got 36

And then I did 144 plus 36."

$$15 = 12 + 3$$

$$12 \times 12 = 144$$

$$3 \times 12 = 36$$

$$144 + 36 = 180$$

15 x 12

Monica

$$(15 \times 10) + (15 \times 2) = 180$$

Malcolm

$$(10 \times 12) + (12 \times 5) = 180$$

Alberto

$$(12 \times 12) + (3 \times 12) = 180$$

**1 Question 11**

Molly ran 1.5 miles each day for 20 days. How many miles did she run altogether?

Rectangular Snip

Molly ran 1.5 miles each day for 20 days. How many miles did she run altogether?

2 Answer

- ☐ Correct (30)
- ☐ Incorrect
- ☐ Self-corrected (30)
- ☐ Did Not Answer

3 Explanation How did you figure out the answer?

- ☐ Used standard algorithm to multiply
- ☐ Multiplied 20×1 and then 20×0.5
- ☐ Multiplied 1.5×2 and then 3×10
- ☐ Multiplied 1.5×10 and then 15×2

Molly Problem

Molly ran 1.5 miles each day for 20 days. How many miles did she run altogether?

Common Core Connection

Grade 5

Number and Operations in Base Ten

Perform operations with multi-digit whole numbers and with decimals to hundredths.

CCSS.Math.Content.5.NBT.B.7 Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.

Molly Problem

Molly ran 1.5 miles each day for 20 days. How many miles did she run altogether?

$$20 \times 1.5 = \underline{\hspace{2cm}}$$

Distributive Property of Multiplication over Addition

Sergio: Molly problem, 20×1.5

(View at www.mathreasoninginventory.com)

“I know that 20 times 1 is 20, so I put the 20 aside. And 20 times 5 is 100, and bloop it by one is just zero . . . 10.0. So 20 plus 10 is 30.”

$$20 \times 1 = 20$$

$$20 \times 5 = 100, \text{ so } 20 \times .5 \text{ is } 10.0$$

$$20 + 10 = 30$$

$$20 \times 1.5 = (20 \times 1) + (20 \times .5)$$

Measurement & Data

Measure and estimate lengths in standard units.

CCSS.Math.Content.2MD.A.1 Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes .

Relate addition and subtraction to length.

CCSS.Math.Content.2MD.B.5. Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units,.

Standards for Mathematical Practice

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. **Construct viable arguments and critique the reasoning of others.**
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.
